Managing partner at Wellen, vice-president of POPAI CE

Participating Companies:

Strategic Marketing in Simulations

The course is built as a semestral tactic/strategic game powered by the StratX Markstrat Simulation – the world leader in the field of professional education and simulations. Students will be divided into five competing teams and will work together on specific assignments and solutions of situations their company will face. It is a very realistic simulation of a multi-year period including the formulation of a long term strategy, its execution, reactions to competitor's market entries, monitoring of previous decisions impacts, strategic and tactical modifications according to the situation and defense of the performance in front of a virtual company board.

Key Elements of the Course:

- Interactions with nonconventional lecturer, who is among the top marketing experts in the Czech Republic
- Real-life feedback from top marketing experts and CEOs of top companies
- Markstrat simulation game

Lecturer:

David Duroň

Former marketing director at Vodafone and O2,
owner of Lemon Beach in Ghana

Participating Companies:

B2B Marketing

The course is based on the strategic B2B marketing simulation Markstrat from StratX, the leader in marketing simulations. Students will form teams, and each group will be solving specific situations and tasks of its company at a strategic level. It is a real simulation of the company's operation within a several years' time frame, including setting up a strategy, its implementation, response to the competitor entry, monitoring the decisions made, and strategic and tactical corrections of particular situations. Part of the course is the presentation of the team strategy and results to the committee of phantom shareholders - real CEOs from business practice.

Key Elements of the Course:

- Interactions with the co-founder of a company with 400 employees and \$46 million in sales
- Real-life feedback from top marketing experts
- Markstrat simulation game

Lecturer:

Libor Mertl

Co-founder and member of the Board at ComAp

Participating Companies:

Applied Multivariate Statistics

With the development of IT technologies in recent years, companies collect a lot of data about their business and clients. There is a growing demand for analyzing such multivariate data to support strategic business decisions, targeting marketing campaigns, or evaluating client satisfaction. Thus, it is important that the companies' decision-makers understand what multivariate analysis techniques are and what can offer them.

The course introduces selected multivariate methods that are commonly used in practice. The emphasis is put on a practical application of these methods in statistical software and interpretation of their outputs. Upon successful completion of this course, students will be able to work with multivariate datasets, i.e., dataset examination, statistical methods application, and to interpret the obtained results.

Key elements of the course:

- focused on the practical application
- a team project based on a real-life dataset
- gaining basic skills in widely used statistical software R

Lecturer:

Zdeněk Šulc, Ph.D.
